#### CREEN'S (NEW) EARLY WHITE CRAPE.

This new variety of Green's Early White originated on the grounds of O. J. Green, Portland, N. Y. Taken from a meadow ditch, placed in a vineyard as a supply vine in 1887, where the original vine now stands.

Origin unknown, hardy, strong grower, heavy foliage, similar to Concord, very prolific, fruit whiter than Niagara, seeds small and easily removed, good quality, flavor excellent, as early as Moore's Early, a trifle smaller than Concord, usually shouldered.

Did not propagate for several years till we were sure it was all right. Have now two acres in bearing. The original vine and vineyard bears annually large crops of early delicious fruit which will ship thousands of miles. Ripens its wood to the tips. Has never been known to winter kill. We have thoroughly tested it in all respects.

PORTLAND, N. Y., January 6, 1897.

I take pleasure in making the following statement about Green's Early White Grape. I handled quite a portion of the crop of this new and valuable grape the past season. Found the demand good at a good price. It was fully as early as any EARLY Grape in this section, this point alone making it valuable. Color, quality, texture and general appearance of cluster render it very attractive. Good shipper. Respectfully, I. A. WILCOX.

For the past three years we have called public attention to this grape in our wholesale list. Now we have the vines for sale. No one else has these vines to offer. When these are gone you can get no more till next year.
